Broadway Limited Locomotive Works Bonusware PRR Tank Car Set for Microsoft(r) Train Simulator.
Copyright (c)2008-2009 Broadway Limited Locomotive Works and Thomas J Pearce. All Rights Reserved.

Thank You Notice:

First off, we at Broadway Limited Locomotive Works would like to thank you for your purchase of the American Car and Foundry Type 21, 8000 Gallon Tank Car pack. it is in high hopes that we wish you many hours of enjoyment with this package. Please make sure you also take the time to examine the PDF Guide we have included, as it includes a short history, details and pictures of the package, and much more.

NOTE:

You will need to own BLLW ACF Type 21 packs 1 & 3 for these to install right.

1. Run the installer (note: Follow all steps carefully,

2. Insert the serial number from the email into the code area, and then click next

3. Change install directory (only as needed) to make sure that this add-on installs directly to where your copy of MSTS is found.

4. Make sure you open the installation directory (usually located at C:\Program Files\Microsoft games\Train Simulator\TRAINS\TRAINSET\BLLW-ACF-Type21-PRR) and run the TANKERINSTALL-1.bat. Once this is done, it will copy in the missing textures and shapes.

5. Go into your consist editing program of choice, and select your new cars, and go enjoy...

For end users who have not installed any other Broadway Limited Locomotive Works Stock, the items will list as such:

BLLW ACF CHIX 1108 (Builder, Car Type, Roadname and Road Number, and Load Status)

If viewing in conbuilder, you can see what cars have what, by right clicking on the car, which will activate the car preview window. This should make it easier to decide what models to use, and also what schemes are appropriate.

Questions? Comments? Email us using the contact us icon on our website. Make sure to specify the add-on, and the problem, and we'll try to help you to the best of our ability.
